Summary

As a dedicated student in and out of the classroom, I desire a chance to grow as a developer in an environment based on innovation and collaboration with fellow developers. Possessing a strong work ethic and a commitment to excellence, I strive to improve my skills on a daily basis in an effort to become a successful full stack developer in the future.

Knowledge and Skills

- HTML5
- CSS3 utilizing RWD
- Typescript via Angular 6
- Javascript
- AJAX
- XML and JSON data formats
- Microsoft Office Suite
- SQL (MySQL) and NoSQL (MongoDB)
- Node.js including Express and Mongoose
- Knowledge of software development lifecycle
- Working knowledge of Java and OOP concepts
- Familiar with Agile methodologies

Experience

Family Dollar Stores June 2006 to Present **Assistant Store Manager** **Store Manager**

I drive profitability through strategic merchandising and superior customer service. My team routinely exceeds sales goals while managing our shrink to a 1.2%. As a member of a training store, I mentor new assistant and store managers before placing them in their respective stores.

Software Development December 2016 to Present **Independent Work**

I construct web applications with a mobile-first mentality using the Angular framework. When I develop software, I build a front end that focuses on the user experience. To accomplish this, I research new technologies and industry best practices to improve my stack. As I utilize software, I analyze the aspects that make it successful and add them to my toolbox.

My passion for development and strong work ethic give me the confidence to solve any problem that I face. If I lack the skills to solve a problem, I research the issue until I find the solution. As I learn, I continue to improve the quality of my software. Working examples of my code are located in my GitHub repository including an online version of my resume.

Education

2017 BS in Business Education, Eastern Carolina University.
Major: Information Technology. Honors: Magna Cum Laude.
